CTE Session 7  
Technologists Committee  
Accessible on-demand at any time

Session Title  
Research - Technologist’s Involvement

Chairperson  
David Bogović (Ljubljana, Slovenia)

Programme  
29 min  Sebastijan Rep (Ljubljana, Slovenia): Conducting the Research

29 min  Inês Melo e Costa (London, United Kingdom): Database Analysis - The Opportunity for Technologists

29 min  Domenico Albano (Brescia, Italy): Team Science - Theory and Practice

3 min  Session Summary by Chairperson

Educational Objectives

1. Highlight the opportunities for technologists in database collections.
2. Understand the responsibilities and challenges for technologists in scientific work.
3. Describe the possibilities and position of technologist in the interdisciplinary research team.

Summary

Nuclear medicine technologist serves as an essential element of the interdisciplinary medical team. With time, technical expertise is becoming crucial for the comprehensive clinical studies outcome. As a person who participates in collecting the database, technologists might be considered multitask specialists who influence diagnostic management and the scientific medical field.

Overall researching process needs database collection, processing and detailed analysis of obtained results, which the representatives of different professions should perform.

Key Words

Medical imaging, quantitative analysis, qualitative analysis, research
